

# **SHEET METAL WORKER**

## **Nature of the Work**

The Sheet Metal Worker is a vital part of the construction team. These workers build products from flat sheets of metal and then install the finished product. The Sheet Metal Worker is responsible for the heating, air conditioning, ventilation and exhaust system ducts in a modern building. They are also responsible for the heating, air conditioning, electronic air cleaning and humidification duct work in new homes. This trade includes the application of all outside architectural sheet metal. Commercial and residential items such as fascia, chimney flashing, valleys, gutters, downspouts and metal roofs are made from metal of various thicknesses depending on how it is to be used. Another category of sheet metal work is the making and installation of kitchen equipment, counters, hoods, tables, cabinets and related exhaust systems. Also, industrial work requiring sheet metal fabrication associated with dust collection, machine guarding, chutes and conveyors is performed by Sheet Metal Workers.

## **Working Conditions**

The Sheet Metal Worker does a great deal of shop work compared to other construction tradespersons, by fabricating sheet metal in the shop. It is then delivered to the job for installation. On a new structure, a craftsperson works both inside and out at the construction site. Much of this work requires the ability to climb ladders and work from scaffolds. A Sheet Metal Worker must always be safety conscious because they can be cut by the tools they use or by the sharp edges of the metal with which they work.

## **Interest and Personal Qualities**

Persons interested in becoming Sheet Metal Workers must have mechanical ability and the ability to follow instructions. The apprentice always works with a journeyman. A good working knowledge of math along with mechanical drawing is an asset. The understanding of blueprints and the ability to work in close tolerances are necessary. They must also enjoy working with their hands and have the desire to think for themselves without constant supervision.

## **General Qualifications**

- Age 18 or older
- Minimum education - high school graduate or equivalent
- Good physical condition - must be able to perform the work of the trade
- Proof of citizenship

## **Admission Requirements of JATC**

- Medical examination may be required
- Credit for Armed Service - subject to review by committee
- Personal interview
- Credit for experience
- Drug and alcohol test may be required

## **Terms of Training**

- Length of apprenticeship - up to 4 year Indentured into the Training Program.
- Related classroom instruction- Approximately 200 per indentured year.

## **Recommended High School Courses**

General Math, Geometry, Trigonometry, Mechanical Drawing, Physics, General Science.
